

National Green Biomed Ltd.'s ["NGB"] strategy for success is to craft high-quality medical and lifestyle products, remain nimble by pivoting within a dynamic industry, and make responsible decisions in an ever-changing climate.

### Investing in growing industries during an economic downturn

The impact of world-wide restrictions on non-essential services has seen dramatic loss of industry while other industries like Cannabis have seen steady increase in growth, with products that seem to sell themselves[6]. The qualified labor force in the Cannabis industry continues to grow [8] as Health Canada issues more security clearances and licenses. This is good news for the economy:

- Larger pool of qualified workers
- Broader knowledge and resource access for businesses
- Stabilization of labor and materials costs
- Greater variety of product at a lower price for consumer
- Reduce the margin between black-market and licensed producers

## Call to Action

We are fund raising to complete the licensing process and to cultivate the first crop.

## Footnotes:

[i] Step-by-step approach: By delaying construction in Mission until reformed Cannabis regulations were tested by the industry, the Company had the opportunity work through a more cost-effective model, as demonstrated in footnote (ii). NGB filed a preliminary long form prospectus to the BC Securities commission January, 2020. In response to licensing delays, and the impact of COVID-19, the company decided to focus on the business. Refer to [www.sedar.com](http://www.sedar.com) to review National Green Biomed Ltd. preliminary prospectus submission.

[ii] Negotiated lease: Discounted rent of \$3k/month for first 2 months, full rent of \$6k starting July 2020. There is a further opportunity to increase rent up to \$10k/month with power upgrade. NGB maintains control and access to fields for Hemp cultivation.

## Disclosure Statement:

Certain statements contained in this document may constitute forward-looking information. Forward-looking information is often, but not always, identified by the use of words such as “anticipate”, “plan”, “estimate”, “expect”, “may”, “will”, “intend”, “should”, and similar expressions. Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information. The Company’s actual results could differ materially from those anticipated in this forward-looking information as a result of regulatory decisions, competitive factors in the industries in which the Company operates, prevailing economic conditions, and other factors, many of which are beyond the control of the Company. The Company believes that the expectations reflected in the forward-looking information are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking information should not be unduly relied upon. Any forward-looking information contained in this news release represents the Company’s expectations as of the date hereof, and is subject to change after such date. The Company disclaims any intention or obligation to update or revise any forward-looking information whether as a result of new information, future events or otherwise, except as required by applicable securities legislation. Readers are urged to consider the risks, uncertainties and assumptions carefully in evaluating the forward-looking statements and are cautioned not to place undue reliance on such information.
